Front-end architecture **Expert**
Product & UX thinking **Advanced**
Data visualisation **Advanced**
Backend & data modelling **Strong**

EDUCATION

B.Tech, Information Technology
Anna University · 2007–2011 · CGPA 8.35/10
Higher Secondary
2005–2007 · 88.25%
Languages
English · Tamil

PROFILE

Senior UI developer with 15+ years across enterprise consulting and product engineering — Mcadyen Digital, Kanini, MatrixCare and Cognizant — now freelancing with SRI REAL TIME, where I take products from data model to interface and out the door. Deep on Angular, React and Next.js, with data visualisation, Python/Flask services and Firebase behind them.

EMPLOYERS

EXPERIENCE

Freelance Full-Stack Developer

2024 – Present

SRI REAL TIME · Remote

Multi-tenant SaaS, marketplaces and e-commerce platforms shipped end to end — architecture, data model, interface and release. 11 products built, 9 live across 10 domains.

Next.js · React · TypeScript · Firebase · Node.js · LLM APIs

Senior UI Developer L2

Apr 2023 – Feb 2024

McFadyen Digital · client: FedEx

Front-end for FedEx's global shipping and logistics platform — the commerce and tracking surfaces behind worldwide package and freight movement, in a large enterprise codebase.

Angular 10+ · React · TypeScript · SASS · REST

Senior Software Developer

2018 – 2021

Kanini Software Solutions

Front-end lead for five engineers on **ICT**, a capability-assessment and roadmap platform. Delivered **Argus** (NLP and image-processing ML) and **Doblin**, a drag-and-drop data forum for senior management.

Angular 2+ · Material · AngularJS · Python · Flask · .NET · Oracle

Software Engineer

2017 – 2018

MatrixCare

Resident tracking and healthcare workflows for senior-living operators, plus **Visualyx** — CSV, TSV, database and flat-file sources turned into tables and charts with PDF, DOC and PNG export.

Angular 2+ · AngularJS · JavaScript · Python · Flask · ML

Associate

2011 – 2016

Cognizant Technology Solutions

iDashboard — deployable business dashboards generated from UI configuration, no code written by the user. **Spotlight** — monitoring and reporting for Java application and database servers: disk, CPU, RAM, JVM, hit rates and error timings.

JavaScript · jQuery · Bootstrap · Fusion Charts · Java · Spring · Oracle

Toolbox

EVERYTHING I BUILD WITH

FRONTEND

React, Next.js, Angular 2+, AngularJS, Vue.js, TypeScript, JavaScript, HTML5, CSS3, SASS/LESS, Tailwind, Bootstrap, Material Design, shadcn, Vite

BACKEND & APIS

Node.js, Express, Python, Flask, FastAPI, Django, tRPC, GraphQL, REST, .NET

DATA & VIZ

PostgreSQL, Oracle, MySQL, MongoDB, Firestore, Redis, SQLite, Firebase · D3.js, Fusion Charts, Highcharts

AI & ML

Claude, OpenAI, Gemini, LangChain, Hugging Face, NLP, image processing, TensorFlow, PyTorch, scikit-learn

CLOUD & DELIVERY

AWS, Azure, Docker, Kubernetes, GitHub Actions, Terraform, Git/Bitbucket, Jenkins, Jest, Jasmine, Karma, JIRA/Kanban

MOBILE

Flutter, React Native

PRODUCTS SHIPPED

Pasumai Trade

Marketplace

Farmer-to-buyer produce trade: growers set their own price, with escrow, quality verification and transport on-platform.

pasumaitrade.com · Next.js, Firebase

Pasumaivelanmai

Agri platform

Field to market in one place: schemes with eligibility, inputs, live rates, a manufacturer console and a growers' community.

pasumaivelanmai.com · Next.js

Chatbot Console

SaaS · AI

One embeddable widget, many tenants, one codebase — branding, voice and knowledge as configuration; answers grounded in real data.

chat.srirealtime.com · Next.js, LLM APIs

Bugloop

Issue tracking

Multi-tenant tracker built around triage rather than a generic board — report, assign, fix, verify, close, with roles and isolation.

bugloop.srirealtime.com · Next.js

BUILDR

Construction

Daily site reports, attendance and wage sheets that save with no signal and sync when coverage returns. Sign-in by mobile number.

[offline-first](https://offline-first.com) · Next.js

RK Badaga Matrimony

Matrimony

Consent first: profiles human-reviewed before going live, numbers hidden until both sides accept, bilingual English and Tamil.

rkbadagamatrimony.com · Next.js

Drape & Thara Sports

E-commerce

Two storefronts organised the way the goods are bought — by weave, by sport — with filters, custom team orders and checkout.

Next.js, Firebase

School ERP & QP Builder

In build

Admissions-to-results school platform, and AI extraction of question papers from PDF and DOCX with the teacher keeping the last word.

Next.js, React, Firebase, AI

✓ HOW I WORK

- ✓ End-to-end ownership: architecture, data model, interface and release.
- ✓ Enterprise habits at product speed — testing, CI, review, Agile delivery.
- ✓ Built for real conditions — offline-first, bilingual, low-bandwidth.
- ✓ Team lead experience: mentoring, estimation, front-end architecture calls.

Open to work

Senior full-stack and front-end roles, or freelance product builds. Remote, worldwide.
